

This is parallel research is closely aligned with the discussions that Todd, Coach and the group had at the Texas fellowship last summer related to “DNA having a frequency”, the “God frequency”... As more disparate sources converge related to DNA and scripture, a picture is forming with DNA being a significant area to watch for end-times and spiritual advances. We already know that these devices have been employed by Satan through the Nephilim, as well as Hitler. Cloning, embryonic and transhumanism intend to enable man to perfect procreation from man-made entities. (*Counterfeit god*)

Includes a detailed reference providing qualitative data supporting the two separate instances of the creation of man recorded in Genesis – Neanderthals and Adam. You should ensure you read the **Q&A** conclusions summarized below.

The Gospel According to DNA

<http://www.genesisandgenetics.org/2014/03/03/208/>

Divine Genetic Resets (Lifespan changes due to DNA – in the Bible)

<http://www.genesisandgenetics.org/2016/11/03/divine-genetic-resets/>

Genetic Change/Reset 1 When Adam sinned in the Garden, he and all of humanity became mortal ([Genesis 3:3](#), [I Corinthians 15:21](#)).

Genetic Change/Reset 2 Before the global flood, the earth was filled with violence ([Genesis 6:11-12](#)); so, after the flood, God changed our DNA to reduce human lifespan from 900 + years (Genesis 5) to what we have now (Genesis 11 and [Psalm 90:10](#)).

Genetic Change/Reset 3 Soon, our DNA will be redeemed and reset back to the immortal state ([1 Corinthians 15:52](#))

Neanderthal and His Biblical Identity

http://www.genesisandgenetics.org/Neanderthal_Identity.pdf

Here are **Questions and Answers** to some mysteries presented in the abstract

1. How did Neanderthal go extinct? Answer: He died in the flood

2. Why is there no evidence of pre-flood man? Answer: There is much evidence of pre-flood man - Neanderthal

3. Why is Neanderthal genetically distinct from modern man? Answer: He did not possess the genetic mutations of the second curse.

4. Why do we have his (Neanderthal) mutations, but he doesn't have ours (modern man)? Answer: He is our common ancestor. See table 2 and Appendix 2.

5. Why did Neanderthal not interbreed with modern man? Answer: He couldn't; Neanderthal and modern man were separated by the flood.

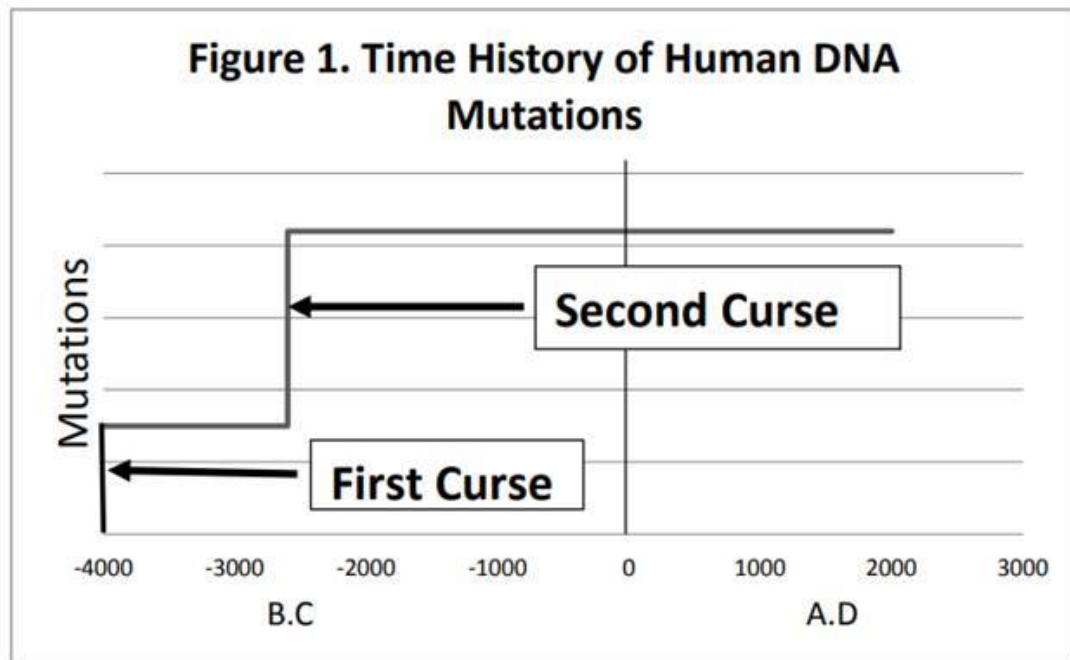

6. Why are Neanderthal's remains found in so many diverse locations? Answer: The flood deposited them there.

7. Why is Neanderthal physiologically and anatomically superior? Answer: His DNA was superior and not subject to the second curse.

8. Where does Neanderthal fit in post-flood Bible genealogy? Answer: He doesn't. We know the DNA from the table of nations people (Genesis Chapter 10) and subsequent generations; none has the Neanderthal genetic signature

2.2 Application of Biblical Model

The Biblical model states everything was very good in the beginning and as a result of sin there were two distinct curses. These curses affected both lifespan and quality of life. It is reasonable to assume that these curses were expressed by means of DNA mutations. DNA is considered to be a language and it follows that God would use it as an instrument of control, much like our modern voice control systems. This would result in an explosion of DNA mutations at the time of each curse. The Bible model is presented in Figure 1 "Time History of Human DNA Mutations."

Therefore if any man be in Christ, he is a new creature: old things are passed away; behold, all things are become new.

2 Corinthians 5:17 KJV

Does our DNA change when we believe in Jesus?

Does our DNA hold the bitting to the key of salvation once cut?

Is Satan's plan to corrupt human DNA to ensure God will say, "Depart from me, I do not know you!"?

Belief

Belief is a change – a change from what you originally believe, or, alternatively, that new information that you learn is agreeable. Our minds then use this new understanding stored in memory to propel our thoughts, bodies and actions. When we dismiss previous understanding and replace with new, updating our memory, we seldom reflect on how staunchly we defended our prior "truth". We quickly forget arguments when our prior false understanding at times offended others that had a better handle on the truth. When we believe that Jesus is the son of God, died on the cross and was resurrected for our sins, then subsequently submit and surrender our own will to God's, understanding that HE orders our steps, **a change happens in us**. Scriptures say we are "born again". That is when we become aware and hunger for a higher spiritual purpose in God's plan while thoughts of our earthly priorities, bodily and material needs fade away.

So what happens when we believe? HOW do we change? Our conscious mind controls our thoughts but morality (*the*

presence or lack of the Holy Spirit) drives the direction that our mind and body carry out tasks. We must decide to be scripturally moral and prohibit behavior that is not reflective of the example in Jesus and God's word. When we believe, we then want to do as Jesus does sacrificing our own will to allow our steps to be ordered by the Lord, therefore we become "changed", but how? Just by wanting to do good or do we physically change?

DNA

So, the question remains: is there a change to our DNA when we're saved by His grace? DNA contains our "genetic code", our uniqueness (*given to us by God*), the signature of our ancestry in the form of our parents, grandparents and theoretically information related to every cell of our body and all generations of our ancestry. The spirit of infirmity-cancer, for instance is "genetic" and passed down as a "genetic trait" and related children will then have the propensity to have the illness. In parallel, many times through scripture are examples of God "cursing" generations – how does he do this? Can he "heal" our DNA as well when we truly decide to give our lives to Jesus?

Critical Thinking:

God is the author of life and new DNA is formed when a couple conceives in accordance with scriptures. Then upon birth, our

bodies along with our DNA begin dying due to original sin, our environment (radiation, food, etc), but what else? What about “new” sin? Can new sin impact your own DNA and future generations? Consider the following questions:

Hereditary damage to our DNA?

- Can our DNA be the instrument of a curse from God? ***(Cain’s generations were cursed as were many others by God)***
- Is sin, the “curse of death”, recorded in our ancestors’ DNA? “sins of the father”? man’s original sin?
- Is our own “current” sin imprinted on **your** DNA and the DNA of future generations?
- **If you knew definitively** ahead of time that your sin damages your personal and future child’s DNA, would you stop sinning or load your child up with your sin problem?

What about healing?

- We know about healing, but can our DNA be spiritually “fixed” to end a generational curse?
- Is Jesus-based spiritual healing an example of spiritually driven change to our DNA once we demonstrate faith? ***(David Arthur is a testimony of this as well as many others.)***

Background Story: a fire is coming to the Middle East

Did you know that as in **Psalms 106**, the inhabitants of Shinar spoken of by David, God enabled the people's temptation to be satisfied (v.14-15) and they turned back to worshiping Baal (v.28) to gain the power to sate their envy toward Moses (v.16) They were stricken by plagues then the earth opened up and swallowed up a portion of the enemy and they burned (v. 18). ***I believe an actual FIRE was kindled in the region and the wicked actually burned.***

They entire Shinar region is a powder keg ready for judgment so the fire above is certainly likely to happen again due to tectonic activity and the abundance of oil in the region. Once the earth splits open during one of the hundreds of quakes happening, there will be oil running in the rivers and streets. Then the impending meteorites, and electromagnetic activity mentioned throughout scripture will ignite the entire godless region and it will likely burn for centuries the likes the world has not seen since the fall of Sodom, Babel (in the center of the Shinar region) and as recorded in Psalms above.

Who lives in this region today?

David in Psalms 106 speaks of a "mingled" people who then inhabited the Shinar region. Who are these people?

They did not destroy the nations, concerning whom the LORD commanded them:

[35](#) But were mingled among the heathen, and learned their works. [36](#) And they served their idols: which were a snare unto them. [37](#) Yea, they sacrificed their sons and their daughters unto devils, [38](#) And shed innocent blood, *even* the blood of their sons and of their daughters, whom they sacrificed unto the idols of Canaan: and the land was polluted with blood. [39](#) Thus were they defiled with their own works, and went a whoring with their own inventions. [40](#) Therefore was the wrath of the LORD kindled against his people, insomuch that he abhorred his own inheritance. [41](#) And he (God) gave them into the hand of the heathen; and they that hated them ruled over them.

Note: v. 36-39 is just like America and the world scene today. Then v.41 God give them over into the hands of the heathen... sounds like another example of a "strong delusion"?

According to the [Interlinear bible, Psa 106:35 -> mingle](#) The Hebrew equivalent to mingle in context is -> arab. **WHAT???**

Mingled blood means ARAB???

`arab

Arabs are “mingled”. What’s this mean?

The Arabs are the inhabitants of this area to this day and they are the only demographic of people that *their original ancestry*

cannot be decoded from their DNA. Arabs as referred to in these passages may have leftover mingled blood from earlier inhabitants ***which is likely why Arabs are so ANTI-Christian – it is written in their DNA.***

Furthermore, the inhabitants of the Arabic countries are known for having genetic disorders and countless studies have been launched to determine the cause and resolution. This condition still exists today and resulted in traditional Muslim female headwear as Watchers/Nephilim could only produce viable offspring from pure humans. After a while, there were likely too many females with corrupted blood and too few pure women left so obscuring females to protect them became tradition...

Genetic diseases Databases in Arabic countries and studies

Several organizations maintain genetic databases for each Arabic country. The [Centre for Arab Genomic Studies](#) (CAGS) is the main organization based in the United Arab Emirates. It initiated a pilot project to construct the Catalogue for Transmission Genetics in Arabs (CTGA) database for genetic disorders in Arab populations. At present, the CTGA database is centrally maintained in Dubai, and hosts entries for nearly 1540 [Mendelian disorders](#) and related genes. This number is increasing as researchers are joining the largest Arab scientific effort to define genetic disorders described in the

region. The Center promotes research studies on these emergent disorders.^[3] Some of the genetic disorders endemic to the Arab world are: [hemoglobinopathy](#), [sickle cell anemia](#), [glucose-6-phosphate dehydrogenase deficiency](#), and [fragile X syndrome](#) (FXS), which is an inherited genetic condition with critical consequences. The Centre provide information about specific countries,^[4] and maintain a list of Genomic diseases.^{[5][6][7]}

Specific rare [autosomal recessive diseases](#) are high in Arabic countries like [Bardet Biedl syndrome](#), [Meckel syndrome](#), [congenital chloride diarrhea](#), severe childhood autosomal recessive [muscular dystrophy](#) (SMARMD) [Lysosomal storage diseases](#) and [PKU](#) are high in the Gulf states. Dr Teebi's book provides detailed information and by country.^[8] Even the Middle East respiratory syndrome coronavirus (MERS-CoV) that was first identified in Saudi Arabia last year, it has infected 77 people, mostly in the Middle East and Europe. Forty of them - more than half - have died. But MERS is not yet a pandemic, could become pervasive in genetic disease patient.^[9]

Conclusion and Final Thoughts/Questions

Does our DNA change once we're "saved"... I believe it does and there are eye-witness testimonies that after salvation, DNA results are different from the same man as prior to salvation. In addition, miraculous healings cannot sustain without the adjoining DNA re-write to maintain health of the bodily parts that were renewed. God's plan is fascinating and these discoveries in His word only spur me evermore forward. Hopefully there is a blessing included in these words. Consider the following thoughts as you continue your own personal

relentless pursuit of the truth. When we know Jesus, He is in us and He will know us individually based on our walk with Him.

If an original Jew and you begin believing in Jesus Christ,

- are you still a Jew?
- Or simply an Israelite that is now a Christian in the Body of Christ?
- Did your DNA change?
- Will God know you as a Jew or simply someone who loves his son, Jesus?

If you're an ARAB and you begin believing in Jesus Christ,

- Will Jesus even know you based on your bloodline?
- Does your Arabic blood and DNA change and become "healthy" once you truly believe in Jesus and have that change of heart I mentioned?
- Or will the "sins of your fathers" prohibit salvation similar to the Watchers' children, the Nephilim? When Enoch was asked to petition God to spare the "watcher's children", through a vision, Enoch was instead told to reprimand the Watchers and the Nephilim were all killed because they were corrupt. *See Enoch 13 below.*

God bless and always be wise to the devices of the enemy as we continue to glorify Jesus through our relentless pursuit of the truth.

Mark

References:

Land of Shinar

Enoch's petition to God on the Watcher's Behalf to Spare Their Children, the Giants, the Nephilim who corrupted God's creation: (Enoch 13)

¹ And Enoch went and said: 'Azazel, thou shalt have no peace: a severe sentence has gone forth ² against thee to put thee in bonds: And thou shalt not have toleration nor request granted to thee, because of the unrighteousness which thou hast taught, and because of all the works of godlessness ³ and unrighteousness and sin which thou hast shown to men.' Then I (enoch) went and spoke to them all (all the watchers, the leaders of the fallen angels) ⁴ together, and they were all afraid, and fear and trembling seized them.

And they besought me to draw up a petition for them that they might find forgiveness, and to read their petition in the presence ⁵ of the Lord of heaven. For from thenceforward they could not speak (with Him) nor lift up their ⁶ eyes to heaven for shame of their sins for which they had been condemned.

Then I wrote out their petition, and the prayer in regard to their spirits and their deeds individually and in regard to their ⁷ requests that they should have forgiveness and length. And I went off and sat down at the waters of Dan, in the land of Dan, to the south of the west of Hermon: I read their petition till I fell ⁸ asleep. And behold a dream came to me, and visions fell down upon me, and I saw visions of chastisement, and a voice came bidding (me) I to tell it to the sons of heaven, and reprimand them.

⁹ And when I awaked, I came unto them, and they were all sitting gathered together, weeping in ¹⁰ 'Abelsjail, which is between Lebanon and Seneser, with their faces covered. And I recounted before them all the visions which I had seen in sleep, and I began to speak the words of righteousness, and to reprimand the heavenly Watchers.
