General Comments:

1. There is a den of wolves in this group
2. They control major messaging platforms, online, print and megachurches around the country
3. Who will become the inside spokesmen for this group and who they access within the White House? This could be very bad for the Remnant.
4. Who was responsible for the vetting of these people to be on this advisory committee and what role will that person have in the White House?
5. I am not sure who can be trusted if we try to get WH intel and have influence on the WH legislative docket.
6. Am I the only one paranoid or "Houston..we have a problem"?
